The portable autonomous solarimeter measures the solar irrigation for the control of photovoltaic and thermal installations on test or on site:

- **Measurement and spot check of the solar irrigation in W/m²**
(instantaneous, average, time-recording, min/max values, hold function)
- **Calculation of the energetic exposure in Wh/m²**
during the timed measures campaign*
- **Storage and saving of average values**
of power and updating the energetic exposure calculation every minutes
- **Recorded data can be read on the display, and the graphic function allows a fast interpretation of the measure file**
