FEATURES

- Reading data from meters (heat, water, gas, electricity...), sensors and controllers
- Independent data log with real time stamp (Real Time Clock)
- Possibility to choose interfaces: M-Bus, GSM/GPRS, RS232, RS485, Data/Req, USB, Analog and Discrete input ports
- Remote communication and updates through GSM/GPRS
- Galvanically isolated interfaces and power supply
- SMS sending for alarm events
- Batteries management. The remote monitoring devices can charge the battery and use it to power supply in the event of blackout

MX-3 data logger is dedicated for real time logging and analyzing of data. Using GPRS/GSM, logger sends data to remote users / server. MX-3 can also communicate with other controllers and sensors. Device has wide range of optional interfaces and protocols and can read any kind of meters, controllers and sensors equipped with standard protocols. Perfect for telemetry/monitoring, control and smart metering.
